Tonino Lamborghini

WATCHES

"In 1981, I started up my new Tonino Lamborghini Style and Accessories company. At the time I was assisting my father in the family group, but I felt the need to do something exclusively of my own, different from the world of engines. I have always been interested in design and accessories and I took inspiration from my engineering background. I've always loved products linked to mechanics, thus it was obvious for me that the first accessory I designed was a watch.
And even today in every product I create there must not be missing a detail somehow related to the automotive and engineering heritage of my family. Uncompromising spirit, Italian ingenuity and design - together with the timeless legend of a brand recognized throughout the globe: these are the values that characterize my brand.
The mission of my company is clear: to spread the passion and spirit of Italy with unique and distinctive products, inspired by Italian industrial design and the Lamborghini family's story".
